ABOUT ME

Senior Software Engineer with 9 years of experience at Google, specializing in distributed systems and machine learning infrastructure. Led cross-functional teams of 12+ engineers to deliver large-scale products used by over 500 million users globally. Passionate about building reliable, high-performance backend systems and mentoring the next generation of engineers.

EDUCATION

Stanford University

M.Sc. Computer Science — Distributed Systems

2013 – 2015

University of California, Berkeley

B.Sc. Electrical Engineering & Computer Science

2009 – 2013

EXPERIENCE

Senior Staff Software Engineer — Google DeepMind San Francisco | Jan, 2020 – Present

- Architected the ML training infrastructure serving Google's large language model research, reducing model iteration time by 40%.
- Led a team of 12 engineers across 3 time zones to redesign the distributed job scheduler, improving GPU utilization from 61% to 89%.
- Designed and deployed a fault-tolerant data pipeline processing 4 petabytes of training data daily with 99.99% uptime.
- Mentored 8 junior and mid-level engineers; 3 promoted to Staff Engineer under her guidance.

Software Engineer III — Google Search

San Francisco | Aug, 2015 – Jan, 2020

- Built real-time indexing system handling 80,000 document updates per second with sub-50ms latency.
- Reduced search ranking model serving cost by 30% via quantization and batching optimizations.
- Contributed to open-source projects including TensorFlow Serving and Apache Beam.

PROJECTS

DistributedKV — Open Source Key-Value Store

- Built a Raft-consensus based distributed key-value store in Go, achieving 200k ops/sec on commodity hardware.
- 500+ GitHub stars; adopted by 3 early-stage startups as their primary storage layer.

SKILLS & LANGUAGES

- Go, Python, C++, Java
- Distributed Systems, ML Infrastructure, Kubernetes, Raft, gRPC
- TensorFlow, JAX, Apache Spark, BigQuery
- System Design, Technical Leadership, Code Review, Mentorship
- English — Native • Mandarin — Native • French — Intermediate
