ABOUT ME

Lead Data Scientist at Netflix with 8 years of experience building recommendation systems and experimentation platforms. Delivered models that measurably increased viewer engagement and reduced churn, impacting billions of streaming hours annually. Speaker at NeurIPS and RecSys; published 6 peer-reviewed papers on large-scale collaborative filtering.

EDUCATION

ETH Zurich

Ph.D. Machine Learning — Recommender Systems 2013 – 2017

Indian Institute of Technology, Bombay

B.Tech. Computer Science & Engineering — Gold Medalist 2009 – 2013

EXPERIENCE

Lead Data Scientist — Netflix Personalization Amsterdam | Feb, 2020 – Present

- Designed the next-generation two-tower retrieval model serving 260M subscribers, increasing top-10 precision by 18%.
- Built Netflix's causal inference framework for recommendation evaluation, replacing proxy metrics with direct causal estimates.
- Led a team of 7 data scientists and 4 ML engineers; established team-wide ML engineering best practices.
- Reduced model training cost by 45% through mixed-precision training and dataset distillation techniques.

Senior Data Scientist — Booking.com Amsterdam | Sep, 2017 – Feb, 2020

- Developed a price sensitivity model predicting booking conversion with 91% AUC, deployed across 43 markets.
- Owned the hotel ranking algorithm serving 1.5M daily searches; improvements delivered €28M incremental revenue in year one.
- Mentored 4 junior data scientists; co-authored internal ML onboarding curriculum.

PUBLICATIONS & TALKS

Selected Publications

- 'Causal Debiasing in Industrial Recommender Systems' — NeurIPS 2023
- 'Scalable Two-Tower Models for Streaming Content Discovery' — RecSys 2022

SKILLS & LANGUAGES

- Python, Scala, SQL, R
- PyTorch, TensorFlow, Spark MLlib, Ray
- Recommender Systems, Causal Inference, A/B Testing, NLP
- Kubernetes, Airflow, MLflow, Databricks
- English — Fluent • Hindi — Native • Dutch — Intermediate
