ABOUT ME

Associate Professor of Computer Science at MIT with a research focus on systems security and privacy-preserving computation. Director of the MIT Secure Systems Lab. Published 42 peer-reviewed papers cited 6,800+ times. NSF CAREER Award recipient. Dedicated educator with consistent top-5% teaching evaluations; courses taken by 3,000+ MIT and Harvard students.

EDUCATION

Carnegie Mellon University

Ph.D. Computer Science — Systems Security

2009 – 2014

University of Lagos

B.Sc. Computer Engineering — First Class Honours

2004 – 2008

ACADEMIC EXPERIENCE

Associate Professor — MIT EECS & CSAIL

Cambridge, MA | Jul, 2020 – Present

- Lead the MIT Secure Systems Lab (12 PhD students, 3 postdocs); secured \$4.7M in research grants from NSF, DARPA, and Google Research.
- Teach 6.858 (Computer Systems Security) and 6.875 (Cryptography & Computation) — avg. rating 6.8/7.0.
- Program Chair, IEEE S&P 2024; Area Chair, USENIX Security 2023 and 2024.

Assistant Professor — University of Michigan

Ann Arbor, MI | Sep, 2014 – Jun, 2020

- Established the PrivSys research group; mentored 7 PhD graduates (5 now in tenure-track positions).
- Recipient of NSF CAREER Award 2016 (\$575,000) for work on hardware-enforced memory safety.
- Best Paper Award — USENIX Security 2018 for 'ShadowStack: Efficient CFI for Commodity Operating Systems'.

SELECTED PUBLICATIONS

- 'Confidential ML Training on Untrusted Hardware' — IEEE S&P 2024 (Best Paper Nominee)
- 'MemGuard: Defeating Side-Channel Attacks via Deterministic Memory Partitioning' — CCS 2022
- 'FairProof: Verifiable Fairness for ML Models Under ZK' — NeurIPS 2021

SKILLS & AREAS

- Systems Security, Cryptography, Privacy-Preserving ML, Trusted Execution Environments
- C, C++, Rust, Python, x86/ARM Assembly
- Research Mentorship, Grant Writing, Curriculum Design, Peer Review
- English — Native • Yoruba — Native • French — Conversational
